

NATURA 2SE

THE PREMIUM DIGITAL HEARING AID THAT'S PROVEN SUPERIOR.

CLINICALLY PROVEN AGAIN AND AGAIN.

Deciding to purchase a hearing aid is an important step in reconnecting with the world around you. At SONIC innovations, we believe your choice should include a full-featured digital hearing aid founded on world-renowned expertise in digital signal processing.

That's why we developed NATURA 2 SE. NATURA 2 SE is clinically proven to improve speech understanding in the presence of noise. Furthermore, a multi-site study confirms that NATURA 2 SE with Personalized Noise Reduction outperforms analog hearing aids. Now choosing a premium digital hearing aid has never been easier.

PERSONALIZED NOISE REDUCTION.

NATURA 2 SE offers our proven Personalized Noise Reduction technology. This can be fully customized to your particular hearing loss by your hearing care provider. Simply put, NATURA 2 SE's Personalized Noise Reduction searches for the differences between background noises and speech-like sounds. Then, it reduces the level of many background noises to enhance your understanding of speech in noise.

DIRECTIONAL^{plus} SYSTEM.

Available on select models, the NATURA 2 SE hearing aid employs our sophisticated DIRECTIONAL^{plus} System that combines our switchable directional microphone technology with our patented Personalized Noise Reduction. When combined, these two technologies offer an optimized hearing-in-noise experience by emphasizing sounds from the front of the hearing aid and de-emphasizing noise originating from all directions.

MORE NATURAL SOUND QUALITY.

NATURA 2 SE's technology is based on an advanced understanding of how the human ear works. It features patented technology that processes sounds in smaller, more exact increments called channels. By processing sound in nine independent channels, NATURA 2 SE is able to better approximate the workings of the inner ear. Your hearing aid provider can program each of these channels to fit your specific hearing loss. Think of it as having the greater range and accuracy of a graphic equalizer, over a simple volume, treble or bass control.

SAVES SPACE AND ENERGY.

NATURA 2 SE puts all of this technology on the tiniest chip available, so it fits easily into the smallest of hearing aids, including Completely-in-the-Canal (CIC) models. And because it uses less battery power than some traditional hearing aids, you save the money and inconvenience of frequent battery replacement.

ABOUT OUR COMPANY.

SONIC innovations designs, manufactures and markets advanced digital hearing aids and hearing aid components. We have developed hearing aids which we believe set a new standard in consumer satisfaction. Simply put, our mission is to be the best hearing health company in the world.

CHOOSE FROM ONE OF THESE MODELS.

Completely-in-the-Canal (CIC)

Mini-Canal (MC)

In-the-Canal (ITC & ITC-P)

Half Shell (HS)

In-the-Ear (ITE & ITE-P)

Behind-the-Ear (BTE)

NATURA® 2 SE is

- PROVEN SIGNAL PROCESSING THAT ENHANCES SPEECH UNDERSTANDING IN NOISE.
- PROVEN DIGITAL NOISE REDUCTION FOR ADDITIONAL BENEFIT.
- PROVEN TECHNOLOGY THAT OUTPERFORMS ANALOG HEARING AIDS.
- THE EASIEST HEARING AID CHOICE YOU'LL EVER MAKE.

FEATURES INCLUDE:

- True Personalized Noise Reduction™ to further enhance speech understanding in noise
- DIRECTIONAL*plus*™ System for an optimized hearing-in-noise experience (available on select models)
- Nine programmable channels for more natural sound quality
- Real-time processing for more lifelike communication
- A highly sophisticated microchip
- Seven models to assure maximum comfort
- Automatic tone alerts for program change and low battery

In a multi-site clinical study most users of NATURA 2 SE showed improved speech understanding in noise. There is only one way to determine your individual benefit—try NATURA 2 SE hearing aids and hear for yourself what NATURA 2 SE can do for you.

Changing the way you hear the world.
