

# QUARTET

EXCELLENT JUST BECAME AFFORDABLE

 **SONIC**  
innovations

## **EXPERIENCE THE DIGITAL DIFFERENCE.**

At last, you can afford and enjoy the truly natural, lifelike sound that only a digital hearing aid can provide. With QUARTET you'll be able to experience the very latest in digital technology, giving you a host of benefits and features that can be adjusted to meet your hearing needs.

## **AFFORDABILITY WITHOUT COMPROMISING QUALITY**

Many of the low-priced digital hearing aids available today compromise superior signal processing and enhanced sound quality in an effort to reduce cost.

SONIC innovations believes that our patented Dynamic Speech Enhancement technology should be the standard for all of our hearing aids from our affordable products to our premium products, delivering advanced signal processing and a more natural listening experience.

QUARTET allows us to offer you a truly digital, truly excellent hearing aid at an affordable price.

## **INDIVIDUALLY ADJUSTED TO YOUR HEARING NEEDS.**

Digital technology allows your QUARTET hearing aid to be personalized for you specific hearing loss. Using computer-based software, it can be adjusted to better meet your unique hearing needs of today. And, should your hearing change during the life of your hearing aid, it can simply be re-programmed for your hearing needs of tomorrow.

## **MULTIPLE MEMORIES.**

An affordable hearing aid shouldn't mean that you sacrifice flexibility. QUARTET allows you to adjust your hearing aid to suit your individual listening needs. With QUARTET's dual-memory option you will have the ability to simply push a button to change your hearing aid to another listening program. This offers you improved hearing and enhanced sound quality whether you're in a noisy restaurant or listening to your favorite music.

## **CHOOSE FROM FOUR MODELS.**

Completely-in-the-Canal (CIC) .....

In-the-Canal (ITC) .....

In-the-Ear (ITE) .....

Behind-the-Ear (BTE) .....

## **ABOUT OUR COMPANY.**

SONIC innovations designs, manufacturers and markets advanced digital hearing aids and hearing aid components. We have developed hearing aids which we believe set a new standard in consumer satisfaction.

Simply put, our mission is to be the best hearing health company in the world.
